

TPM 30 FM Transmitter

Offering broadcasters the outstanding performance of super audio quality.

With a variable output from 5 to 35 Watts and the internal harmonic filter.

The TPM 30 may be used as a low power transmitter.

The TPM 30 is totally self-contained and all subassemblies are modular and accessible from the top of the transmitter.

All components have been selected to exceed the rated requirements for their application providing years of trouble free service.

The transmitter will act as stereo or mono.

Features:

- * Compact Chassis
- * Frequency Setting on request from 87.5 MHz to 108MHz
- * Auto Power Control - Output power is maintained at your selected level.
- * Display - Red colored LEDs provide easy viewing off all parameters under high ambient light.
- * Extensive transmitter protection minimizes system downtime
