DX-S8

TWO-WAY HIGH OUTPUT COAXIAL 8-INCH SURFACE MOUNT LOUDSPEAKER

APPLICATIONS

DISTRIBUTED

Bars and Restaurants · Hotels · Casinos Shopping Malls · Health and Fitness Clubs Houses of Worship · Presentation Spaces Sports Facilities · Outdoor Entertainment Exhibit Halls · Amusement and Theme Parks

DESCRIPTION

The Desono™ DX surface mount loudspeakers provide high efficiency, high output, high intelligibility and low distortion in an attractive design. These loudspeakers install quickly and have the same components and voicing as the DX ceiling loudspeakers. The DX surface mount loudspeakers are equipped with a built-in 70 V/100 V autoformer and low impedance input.

For larger installations, the 8" coaxial DX-S8 provides higher sound pressure levels, higher sensitivity and greater bass extension. The DX-S8 also easily outperforms competitive loudspeakers of similar size. With a modern appearance that merges well in most environments, combined with weather-resistant capability suitable for direct outdoor use, the DX-S8 can be used in a wide variety of speech and music applications.

Installation is simple and flexible with Biamp's innovative, patented ClickMount pan-tilt bracket allowing low profile mounting in either vertical or horizontal orientation without moving the bracket position. The power tap switch can be set before the speaker is mounted on the bracket. A ClickMount U-Bracket accessory is also available for low-profile mounting and includes the ClickPlug with an integrated gland nut for weatherresistant applications. Both brackets are theft and tamper resistant.

FEATURES

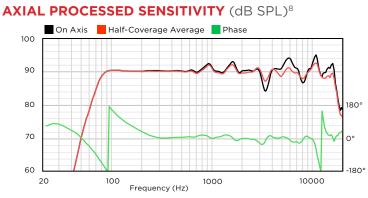

- High efficiency, high output, high intelligibility, low distortion
- Uniform coverage from coaxially mounted HF/LF drivers
- Innovative ClickMount[™] pan-tilt bracket makes installation and aiming easy
- Uniform voicing with DX ceiling loudspeakers
- ETL listed, certified to CSA 62368-1, CE marked, and RoHS compliant

TECHNICAL SPECIFICATIONS¹

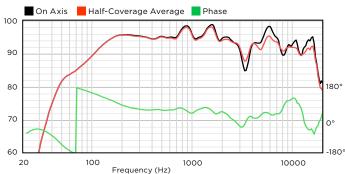

Operating Mode	Single Amplified with DSP				
Operating Environment	Indoor / Outdoor Direct Exposure				
Operating Range (-10dB) ²	62 Hz to 18 kHz				
Nominal Beamwidth (H x V)	110° x 110°				
Transducers	LF 1 x 8" (203 mm) HF 1 x 1.25" (32 mm) exit compression driver				
Sensitivity ³	95 dB (2.83 V) 94 dB (1 W at rated impedance)				
Nominal Continuous Power Handling⁴	Passive	35 V (175 W @ 7 Ω)			
Nominal Maximum SPL⁵	Passive	Peak 122 dB	Continuous 116 dB		
Rated Continuous Voltage ⁶	Passive	29.2 V (2	9.2 V (29 dBV)		
Rated Maximum SPL ⁷ (Processed)	Passive	Peak 126 dB	Continuous 114 dB		
Autoformer	70 V : 120 W, 60 W, 30 W, 15 W; 100 V : 120 W, 60 W, 30 W				
Recommended Amplifiers	Passive 175 W - 350 W into 8 Ω, (37 V - 53 V)				
Crossover Frequency	1.4 kHz				
Required Accessory	60 Hz, 12 dB/oct. electronic high pass filter				
PHYSICAL					
Input Connection	Lever-actuated wire clamping 4-position terminal block with pass-through				
Controls	Wattage / low impedance selector switch				
Mounting Provisions	ClickMount pan-tilt bracket				
Certifications	ETL listed, certified to CSA STD C22.2# 62368-1				
Environmental Rating	IP54 per IEC 60529, IEC 60068-2-5 (Solar Radiation), IEC 60068-2-11 (Salt Mist), IEC 60068-2-42 (SO2), IEC 60068-2-60 (Chlorine)				
Dimensions H x W x D	385 x 255 x 260 mm (15.16" x 10.04" x 10.24")				
Weight	7.71 kg (17.0 lbs) - loudspeaker only				
Finish	Refer to the Technical Drawing (page 3)				
Accessories (included)	ClickMount pan-tilt bracket				
Models (Order by color)	DX-S8-W - White loudspeaker with ClickMount pan-tilt bracket DX-S8-B - Black loudspeaker with ClickMount pan-tilt bracket				
OPTIONS					
Accessories	ClickMount U-Bracket with ClickPlug (SPA-UBDX200 -B/-W)				

Biamp strives to improve its products on a continual basis. Specifications are therefore subject to change without notice.

NOTES

- 1. PERFORMANCE SPECIFICATIONS All measurements are performed using a timewindowed impulse response to eliminate reflections, approximating an anechoic environment, at a distance of at least 6.0 m. All acoustic specifications are rounded to the nearest whole number. An external DSP using settings provided by Biamp is required to achieve the specified performance; further performance gains can be realized using the FIR loudspeaker optimization presets available in Biamp's Community Amplified Loudspeaker Controllers (ALC SERIES).
- 2. OPERATING RANGE The frequency range over which the on-axis equalized/processed response remains within 10 dB of the rated sensitivity, in accordance with IEC 60268-5.
- 3. SENSITIVITY The broadband SPL of the loudspeaker when pink noise is applied (band limited to the loudspeaker's Operating Range) at an input voltage of 2.83 V, in accordance with IEC 60268-5. Also listed for a voltage that would produce 1 watt into the nominal impedance. Measured in whole space with no external processing applied, except where indicated.
- 4. NOMINAL CONTINUOUS POWER HANDLING The maximum continuous nominal input voltage at the rated impedance that the system can withstand, without damage, for a period of 2 hours using an IEC 60268-1 defined spectrum with recommended signal processing and protection filters.

- 5. NOMINAL MAXIMUM SPL The SPL produced when an IEC 60268-1 signal is applied, at the nominal input voltage, to the equalized/processed loudspeaker system. Referenced to a distance of 1 meter. The peak SPL represents the 2:1 (6 dB) crest factor of the IEC 60268-1 test signal.
- 6. RATED CONTINUOUS VOLTAGE The maximum continuous rated input voltage for the system that results in no more than a 3 dB change in the system's response during operation.
- 7. RATED MAXIMUM SPL The SPL produced when a typical program material signal is applied to the equalized/processed loudspeaker system, at a level which drives at least one subsection to its rated continuous voltage limit. Referenced to a distance of 1 meter. The peak SPL represents the 4:1 (12 dB) crest factor of the program signal.
- 8. AXIAL (PROCESSED) SENSITIVITY The variation in acoustic output level with frequency for a swept-sine measurement signal. The Processed measurement uses the recommended signal processing for the loudspeaker system. The other sensitivity measurements use no additional external processing. All data are referenced to 1 meter. The on-axis magnitude and phase responses, as well as the average magnitude response, calculated over one-half of the nominal coverage angles, are shown. The responses have 1/6 octave smoothing applied

- 9. HORIZONTAL / VERTICAL OFF-AXIS RESPONSES The loudspeaker's magnitude response at various off-axis angles using the recommended signal processing in the operating mode which utilizes the largest number of individually amplified pass bands. The responses have 1/3 octave smoothing applied.
- 10. DIRECTIVITY INDEX The ratio of the on-axis SPL to the mean SPL at the same distance for all points within the measurement sphere for each given frequency; expressed in dB. The response has 1/3 octave smoothing applied.
- 11. BEAMWIDTH The included angle between the -6 dB points in the polar response of the loudspeaker when driven in the operating mode which utilizes the largest number of individually amplified pass bands. The responses have 1/3 octave smoothing applied.

Data presented on this data sheet represents a selection of the basic performance specifications for the model. These specifications are intended to allow the user to perform a fair, straightforward evaluation and comparison with other loudspeaker spec sheets. For a detailed analysis of this loudspeaker's performance, please download the GLL file and/or the CLF file from our website: www.biamp.com
